DAVID H'S 30TH ANNIVERSARY

David H. Isaac, Vice-President Operations, Cleaning Expert, Supervisor, #1 Salesperson, all of these titles are only some of the positions that he is actively handling. Words only describe just the surface of what he is capable of. Let's celebrate with David and let him know how appreciative we are of him and all of his hard work. Slàinte to David!

Let's take a trip down memory lane when it all started over 30 years ago when David, a 19 year old coming from Mexico, just looking to make his mark on the world. Little did he know that this new job would be the beginning of a wonderful career.

David started as a general cleaner who always performed above and beyond the normal expectations. It wasn't long before he was given the prestigious position of carpet cleaner. He grew his reputation with customers and...

- Pressure Washing

... became highly sought after and recommended. His attention to detail and willingness to work with clients made him popular, not only would he perform his work impeccably, but he would also offer explanations of his work and top off service with helpful advice in maintaining his work after he was finished.

After spending several years in the field doing everything from carpet cleaning to washing windows and stripping floors, he had proven to Kelly Cleaning that he was an invaluable part of the organization. His talents and determination proved that he was ready to be promoted to a position where he could use his skills in more administrative areas of the company.

Now after 30+ years of giving his all to this company, he sits in the Vice-President position and oversees the company in its day to day operations. On top of this he is a great father and family member that is always willing to lend a hand and offer sagely advice. So, the next time that you see him on a jobsite, in the office, or at the grocery store, congratulate him and give him a "Slàinte" for his good deeds and loyalty to Kelly Cleaning!

SIERGE'S SOLUTION

Dia Dhuit (JEE-uh Gwitch) = Hello Siege! I have cleaned my toilets hundreds of times and I still can't get the hard calcium ring out of the bowl, what do I do?

Dia Duit and may the road rise up to meet you! We have the tool just for you! Now just a fair bit of warning with this tool. Once you use this tool, you will have to continue to use it if the same problem arises again. This tool is a pumice stone, which you can buy at the Kelly Tech Store.

This tool should be the last ditch effort if no other cleaning methods work. The reason for the caution is due to the pumice stones' highly abrasive cleaning design. So let's be clear, this will remove that stuck on deposit whether it is a toilet ring or burnt on black barbecue grills. The pumice stone works miracles in minutes.

Also to be noted, due to its porousness, if you use a pumice stone for your toilet, it should only be used for the toilet. A pumice stone should be used for one area and one area only so you may want to pick up a few.

You can pick up a pumice stone at the Kelly Tech Janitorial Supply Store in Ventura right off Victoria!

Next Air Duct & Dryer Vent Cleaning
Service of \$300 or more

\$50 Off

SLÁINTE!

Sláinte (Slon-che) = Cheers!

March's Cleaner of the Month award and winner of the \$50 grand prize goes to... Raymundo Ruiz!

Raymundo has been working with Kelly Cleaning for just over a year now and he's been amazing! He has received numerous compliments on not only his work, but also his supervision of his crew and his dependability.

Way to go Raymundo! Sláinte!

TIPS ON TOMATOES!

It might be a surprise, but we here at Kelly love getting our hands dirty in our gardens. This is going to be a great season, especially with all the rain we have been getting. One crop in particular we are looking forward to is tomatoes, and I think we've compiled a few helpful tips that you too can use.

- First find out what zone you are in! If you are in Ojai or Santa Paula, you are in zone 9b. Most other parts of Ventura County are in 10a
- Choose the best variety for your growing zone
 - 9b: Beefsteak types are going to be your friend. Our recommendation is Early Girl and Sun Master
 - 10a: Our recommendation is Big Beef
- Timing your plants is super important. The planting season starts in April and ends in August.
 - We recommend April to give you more opportunities to replant if issues occur
- Once the plant is established, we recommend a liquid fertilizer like compost or worm casting tea every two weeks.
- Have a structure for your tomatoes to climb and remove non productive branches from your plants.
- Lastly, water your plants regularly in the early morning before the sun rises. Water will give your tomatoes the energy they need to be bountiful and healthy.

Also, after you have tracked dirt from the garden onto your carpet or floor you can call Kelly to come out and clean up the mess. We are always ready to be of service one way or another.
